## CHESHIRE NURSERY

*The North-Eastern Forestry Company*

COLLEGE HIGHWAY  
Cheshire, Connecticut

# Foreword

In presenting this, our first illustrated catalog, we have given much care and thought to making it as complete as possible. Our nursery which consists of 92 acres under cultivation, places us in a position to offer the variation of sizes listed in this catalog. Bear in mind that you are buying from the source of supply and that any tree, plant or shrub you may order will be freshly dug.

The prices shown are for trees of our selection. These will be fine, full, healthy specimens. Should you wish to choose your own, we must, because of increased labor, make a small additional charge.

We maintain a Landscape Department which is always ready to help you with your planting problems, whether they be large or small. Experience and knowledge of planting materials are necessary if your landscape development is going to present a picture of delightful charm. Should you wish to consult one of our landscape experts, write or phone us. This will place you under no obligation.

We wish to extend to you a cordial invitation to visit our nursery and display grounds. Here you will find the different varieties of evergreens, shrubs and perennials placed in many effective arrangements. These will offer many helpful suggestions for your planting problems.

## OUR GARDEN SHOP

Introducing the newest addition to our already complete nursery. Here you will find a complete line of Seeds, Garden Implements, Fertilizers, Garden Furniture and Pottery. Take a pleasant ride out to our nursery and inspect the cheery little shop. It will be profitable to you.

# Information

**Location**—Our nursery is located in Cheshire, Conn., on the College Highway, twelve miles north of New Haven. Trolley cars running from New Haven to Waterbury, pass directly through the nursery. Good roads from New Haven, Waterbury, Meriden and Wallingford enable you to motor from any of these cities.

**Shipping Seasons**—The Spring shipping season usually begins early in April and continues until about the first of June. In the Fall, the evergreens and perennials may be successfully transplanted from the middle of August until the middle of October, and flowering shrubs during October and November.

**Shipping Instructions**—When ordering stock, please set a date on which you wish your shipment to go forward. We will be glad to ship in any way that you may direct, but in the absence of instructions we will ship to you in what we judge to be the best way.

**Conditions of Sale**—Five or more plants of the same variety and size will be furnished at the ten rate, fifty or more at the hundred rate, five hundred or more at the thousand rate.

The prices quoted do not include transportation charges. No packing charge is made except for boxes, which are charged at actual cost.

Our nursery stock has been inspected by the State Nursery Inspectors. A copy of the Inspection Certificate accompanies all shipments. All stock is of high quality, thrifty, native grown, and is carefully dug and packed. Having no control over the stock after it leaves our nursery, we cannot guarantee the life of the stock. We will, however, be glad to consider any just complaint which is made within a reasonable time.

Evergreens of the ornamental sizes are dug with a ball of earth and this ball is covered with special burlap which may be left on the trees when they are planted. No charge is made for this service.

If you live within a short distance of the nursery, an order of reasonable size will be delivered to you by truck without charge.
